DETAILED ACTION

Reason For Allowance

1. Claims 1-10, 12-22, 32-49, 51, and 54-57 are allowed.
2. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1 and 8, which include substrate having protrusions, spring units elastically supported by the protrusions, trenches formed in the main upper surface of the substrate, lower electrodes formed in each trenches.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is consider pertinent to applicant's disclosure.

Katase (U.S. Patent No. 6,525,865 B2) discloses electrophoretic display and method producing the same in Figure 16 with the sealer (item 202C) is composed of a material which is less in specific gravity than the dispersion (item 1) and hardened by hardening. However, Katase's publication date is later than the application claimed priority date.
